- National Library of Medicine Catalog, 1960*.....out of print
- National Library of Medicine Catalog, 1961, 1962.* (Part one: *Authors*; Part two: *Subjects*).....\$20 per year
(plus 50 cents postage)

HOW TO ORDER THE CATALOGS

Orders for the catalogs published by J. W. Edwards, Inc., Judd & Detweiler, Inc., Pageant Book Company, or Rowman and Littlefield, Inc., should be placed directly with them.

All the other publications are sold by the Card Division, Library of Congress, Washington 25, D. C. Their purchase may be charged against the accounts of subscribers to the card service; others must pay in advance by check or money order made payable to the *Card Division, Library of Congress*.

Payments from foreign countries for these latter publications may be made with UNESCO coupons.

Library of Congress Catalog—Motion Pictures and Filmstrips
L. C. card 53-60011

INTRODUCTION

History. The Library of Congress began issuing printed cards for motion pictures and filmstrips in September 1951. These cards represent films cataloged by the Library of Congress and by libraries and institutions contributing to its cooperative cataloging program.

The cards for films printed in 1951 and 1952 are represented in a special volume of the quinquennial cumulation of *The Library of Congress Author Catalog 1948-1952*. These cards, if they represented a film issued from 1945 on, are also included in the quinquennial cumulation of the *Library of Congress Catalog—Books: Subjects 1950-1954*. The Library of Congress catalogs in book form were reorganized in January 1953. Since then *Motion Pictures and Filmstrips* (the 1953 issues had the title *Films*) has been published as a special part of the comprehensive *Library of Congress Catalogs*, thereby providing a special tool for this type of material. This cumulation supersedes the four annual cumulations of the *Library of Congress Catalog—Motion Pictures and Filmstrips* for 1958-1961, and the quarterly issues for 1962. It is continued and kept current by quarterly issues and annual cumulations.

Purpose. *Motion Pictures and Filmstrips* is designed to reproduce the catalog cards for motion pictures and filmstrips currently printed by the Library of Congress. It constitutes a reference and research tool for a large part of such audio-visual materials. It serves also, by indicating the LC card number, as a tool for the ordering of LC printed catalog cards.

Scope. *Motion Pictures and Filmstrips* includes entries for all motion pictures and filmstrips (but not for microfilms) currently cataloged or recataloged on Library of Congress printed catalog cards. The Library of Congress attempts to cover all films of educational or instructive value that are released in the United States or Canada. Data needed for the catalog entries is supplied by film producers or their distributing agencies. United States government films are cataloged through the cooperation of the Visual Education Service of the U.S. Office of Education. In addition, from 1951 through April 1957, cards were printed for virtually all of the published motion pictures and filmstrips which were registered for copyright during that period. Since May 1957 cards have been printed only for those copyrighted films which have been added to the collection of the Library of Congress or for which data has been supplied by producing or distributing agencies.

Entries. A film is entered under its title, followed by the explanatory phrase *Motion*

picture or *Filmstrip* enclosed within parentheses. References to the films are provided through added entries appropriate to the normal reference, bibliographic, and service requirements of a general collection of films; for example, the names of individuals responsible for production, producing companies and distributors, author and title of a published work upon which the film is based or with which it is correlated. References from alternative titles or distinctive subtitles of films to the entry under which the film is listed are also included.

Subject Control. *Part two: Subject Index* is based on *Subject Headings Used in the Dictionary Catalogs of the Library of Congress*, its cumulative supplements, and auxiliary lists, and on the subject authority cards filed in the Official Catalog of the Library of Congress. The principles employed in the construction and application of these headings are, in brief, the use of terms in common American usage in direct form as subject headings and the application of the most specific headings to the material entered.

References from terms which are not used to those which are used (*see* references) and references to more specific subjects or coordinate subjects representing other aspects or closely related matter (*see also* references) are provided.

In order that each film be included in the subject index, form subject headings (e.g., Cartoons, Juvenile films, Operas) are used to index films of a theatrical, creative, or autobiographic nature whenever the content of the film does not warrant conventional treatment under a specific subject.

Policy. *Motion Pictures and Filmstrips*, a cooperative publication made possible only by the common interest of its subscribers and the Library of Congress in the development of tools for the aid of the researcher and the general public, will be kept responsive to the needs and suggestions of its users. A continuing effort will be made to cultivate its potentialities and usefulness within the limits of available means.

Inquiries. *Motion Pictures and Filmstrips 1958-1962* was compiled and edited by the Catalog Maintenance Division of the Library of Congress. Questions and suggestions of an editorial nature should be addressed to the Editor of Catalog Publications, Catalog Maintenance Division, Library of Congress, Washington 25, D.C. Orders and business matters should be addressed to Rowman and Littlefield, Inc., 84 Fifth Ave., New York 11, New York.

JOHN W. CRONIN

Director, Processing Department
The Library of Congress
Washington 25, D.C.

EXPLANATION OF CERTAIN MARKS AND SYMBOLS USED IN THE ENTRIES

Examples

1. Lathes
i. National Safety
Council

Immediately below the physical description and any notes concerning the film are listed the *subjects* with which it deals (preceded by Arabic numerals) and the *names of persons and corporate entities* connected with the film (preceded by Roman numerals). These terms, including Series, are used in preparing headings for cards in film catalogs, and indicate that entries will appear in such catalogs under the name of the series, etc.

649.8

The number in the middle of the last line of an entry is the *Dewey Decimal Classification number*, which is assigned for use by film libraries in classifying films by that system. To the end of 1951 these numbers were based on the 14th edition of the *Decimal Classification*. During 1952-1958 both the 14th and 15th editions were used. If the numbers from the two editions were alike except in length, only the longer number was given. If the numbers differed other than in length, both were given. In all cases, numbers taken from the 15th edition were preceded by an *asterisk*. Since January 1959 numbers have been assigned from the 16th edition only. Numbers prefixed by a "j" are used for juvenile films and are assigned from the 8th abridged edition of the *Decimal Classification*. This latter practice was begun in May 1961.

*649.1 649.6
j 629.4

The number assigned to each card for identification, ordering, and stocking purposes appears in the lower right corner of each entry, on the same line as the numbers described above. Cards may be ordered from the Card Division of the Library of Congress by using this *card number*. It consists of a prefix, Fi, followed by two digits of the year the card was first printed, and a serial number. Rev, rev 2, etc., indicate *revision* of the original entry.

Fi 52-2115

rev

Many organizations and institutions participate in the cooperative cataloging program by sending information for the cataloging of certain films to be printed as LC cards. These cards show the symbol Fi A. The name of the *contributing organization or institution* appears in the lower left corner of the entry.

Fi A 52-711
British Information
Service

The U.S. Office of Education prepares the cataloging copy for United States Government films. These cards are issued in the Fi E series, and show U.S. Office of Education, Visual Education Service in the lower left corner.

Fi E 52-2728
U.S. Office of
Education. Visual
Education Service.

To locate individual films it is suggested that the producer or distributor indicated in the entry be contacted. U.S. Government films can most easily be located by contacting the Visual Education Service of the U.S. Office of Education.

MOTION PICTURES AND FILMSTRIPS

A

The AACs story (*Motion picture*) U. S. Dept. of the Air Force, 1959.

16 min., sd., color, 16 mm.

Revision of the 1950 motion picture of the same title.

Summary: Depicts the scope and mission of the Airways and Air Communications Service.

1. U. S. Airways and Air Communication Service. 1. U. S. Dept. of the Air Force.

Order no. SFP 618 358.44 Fi E 60-180

Abdominal angina: surgical treatment with aorta to celiac and superior mesenteric artery bypass (Motion picture) George C. Morris, 1961.

12 min., sd., color, 16 mm.
 Summary: Describes the pathologic process that produces abdominal angina, and the characteristic symptoms of this condition. Follows the successful surgical treatment of a 60-year-old man on whom the clinical diagnosis was confirmed by lateral aortography, and shows the operative steps in revascularization of his alimentary viscera. Explains the use of a dacron graft as a bypass from the aorta to the celiac and superior mesenteric artery. Exhibits a lateral aortogram showing the functioning graft and a view of the patient after gaining 40 pounds in weight.

Colonial Film and Equipment Company

Air and water, grade 5 (Filmstrip) Colonial Films, 1960.

45 fr., color, 35 mm. (Advanced elementary science series C, no. 5)

With teachers guide.

Summary: Explains that the pressure of the air varies at different altitudes, that moving air exerts pressure than still air, that air pressure can be measured, and that clouds may be classified. Demonstrates that water has weight and exerts pressure, that the boiling and freezing points of water may change when substances are dissolved in it, and that the temperature and the amount of moisture in the air determine the type of precipitation.

Credits: Director, Woodford B. Baker. 1. Atmospheric pressure—Juvenile films. 2. Hydraulics—Juvenile films. I. Colonial Film and Equipment Company, Atlanta. Series: Advanced elementary science series C (Filmstrip) no. 5.

Air and water, grade 6 (Filmstrip) Colonial Films, 1960.
41 fr., color, 35 mm. (Advanced elementary science series C, no. 6)
With teachers guide.
Summary: Describes the composition of the earth's atmosphere and explains that it consists of three distinct regions. Explains that things give off water and carbon dioxide, that the availability of water is an important factor in determining the types of plants and animals that will be found in a community, that water is a poor conductor of heat, and that temperature in water rises and falls more slowly than temperature in air.
Credits: Director, Woodford B. Baker.

Air-conditioned planet (Filmstrip) Eye Gate House, 1961.
43 fr., color, 35 mm. and disc: 2 s., 10 in., 33 1/3 rpm, 11 min. (Mysteries of science, no. 2)
With teachers manual.
Based on the book *Wonders of science*, by Gary Webster (pseud.).
Summary: Discusses water as the key to global temperature control. Describes the role of water vapor in temperature control, the existence of water as liquid, gas, and ice, and the transition between these states as a significant factor in temperature control. Explains that the unique molecular structure of water is the secret of its thermal properties. Points out that the structure and behavior of water are evidence of the scrupulous care with which God planned the smallest details of the world.

Animals of the muddy beach (Motion picture) KCTS.

Released by NET Film Service, 1958.

29 min., sd., b&w, 16 mm. (Animals of the seashore)

Summary: Shows how marine animals are adapted for survival on the muddy beach and points out the physical features of the muddy beach which affect the lives of the animals living there. Uses film sequences and specimens from the studio aquarium to show the physical characteristics and habits of various clams, including the soft-shelled horseshoe crab, and bent nose clams. Presents the digging movements of cockles and the escape reaction which they use when attacked. Discusses various types of worms found on the muddy beach. Features Dr. Dix Lee Ray of the University of Washington.

Are American freedoms in danger? (Motion picture) WGBH-TV. Released by NET Film Service, 1959.

29 min., sd., b&w, 16 mm. (Seminar on American civilization)

Summary: Presents a panel discussion on the present status of freedom in America. Dr. Max Lerner and five Brandeis University students offer opinions on whether freedom is merely an ideal, whether living in a democracy has become a burden, and whether America is capable of enjoying freedom. They review the issue of McCarthyism, the effect of pressure groups on freedom, and whether one freedom can endanger others.

Are the ideals of our parents outmoded? (Motion picture)

New York Herald Tribune, 1955. Released by NET Film Service.
30 min., sd., b&w, 16 mm. (The world we want: 1955)
Summary: Presents members of the New York Herald Tribune World Forum and forum director Helen Hiet Walker. Students from Pakistan, South Viet Nam, South Korea, Nigeria, and South Africa discuss the relationship of modern-day high school students to their parents in their own countries. The student from India maintains that they have to disobey their parents in order to push new ideas ahead. The other students agree, but add that disagreeing with one's parents is a difficult thing to do. The student panelists point out that they have had to adjust to more changes in the past seventeen years than their ancestors did in the last 700 years.

Art of England (Filmstrip) Encyclopedia Britannica Films, 1960.

50 fr., color, 35 mm. (National Gallery of Art)

Summary: Traces the development of English art through the period when foreign court painters such as Holbein and Van Dyck introduced continental styles. Shows the full flowering of English art during the eighteenth century with the great portraitists of the Georgian era, Reynolds, Gainsborough, and Raeburn. Illustrates how the English landscapists Constable and Turner revolutionized the portrayal of nature.

Atlantic decade (Motion picture) North Atlantic Treaty Organization. Released by National Film Board of Canada, 1959.

29 min., sd., b&w, 16 mm.
 French version released under the title L'O. T. A. N. A dix ans.
 Summary: The story of NATO from 1947 to the present. Recalls the pressure of the communist tide during the immediate post-war years. Outlines the operational structure of the NATO alliance and shows how its purposes of peace-through-preparedness are supported by the economic and military resources of the member nations.

 National Film Board of Canada Fi A 60-398

The Atlantic region (Motion picture) National Film Board of Canada, Montreal, 1957.

29 min., sd., b&w, 16 mm. (Canadian geography series)
 Summary: Presents a study of the east coast region of Canada and the life and industry of its people. Discusses the direct influence of geographical factors on the development of the area, showing how the readily available sea harvests gave rise to the great Maritime fishing industry, and how the development of farm lands, mineral deposits, and forest resources established other industries.

The Atlantic region: Deep-sea fishing (Filmstrip) National Film Board of Canada, 1960.

81 fr., color, 35 mm. (Canadian geography series)
 With manual.
 Summary: Captioned photographs, maps, and diagrams show the extent of otter-trawling in the Grand Banks fishing grounds. Shows how electronic equipment is used to locate schools of fish and how the otter trawl is constructed. Depicts operations aboard the trawler from the time the net spills out its catch to the time the diluted, ice-packed fish are delivered to the packing plant.

The Atlantic region: from forest and farm (Filmstrip) National Film Board of Canada, 1958.

47 fr., color, 35 mm. (Canadian geography series)
 With manual.
 Summary: A survey of the main forest and agriculture industries of Canada's Atlantic Provinces. Shows the forests from which are cut the timbers for shipbuilding and the soft-wood logs for the pulpwood mills. Follows the process of paper manufacture from forest to newspaper. Shows some of the vegetable crops, tree-fruit crops, and berry crops of the Maritime Provinces, as well as scenes of dairy farming, poultry farming, and milk and fox farming. With captions.

The Atlantic region: From mine and river (Filmstrip) National Film Board of Canada, 1959.

88 fr., color, 35 mm. (Canadian geography series)
 With manual.
 Summary: A view of mining activities in the Maritime Provinces and of recent hydroelectric developments. Includes scenes of coal mines of Cape Breton Island, of iron mines in Newfoundland, and of gypsum mines in Nova Scotia. Locates on maps the regions for other minerals, such as fluorapatite, copper, lead, and zinc. Shows the manufacture of iron ore into steel and some of the uses of steel in the Maritime's manufacturing industries. Explains that hydro power developments are closely linked with the industrial potentials of the region, showing some of the main installations. With captions.

Basic electricity: AC parallel circuits (Motion picture) U. S. Dept. of the Navy, 1959.

5 min., sd., b&w, 16 mm.

Summary: Shows the elements of an AC parallel circuit, examines the effects of current, and shows what the generator sees in the following circuits: LC parallel circuit, where X_L exceeds X_C ; and LCR parallel circuit, where X_C exceeds X_L ; and an LCR parallel circuit, where X_C equals X_L .

1. Electric circuits. 2. Electric currents, Alternating. I. U. S. Navy Dept. Order no. MN 8018-d 537.63 Fi E 60-9 U. S. Office of Education, Visual Education Service

Basic electricity: AC series circuits (Motion picture) U. S. Dept. of the Navy, 1959.

4 min., sd., b&w, 16 mm.

Summary: Shows the elements of an AC series circuit; demonstrates, by sine waves and circuits, the effects upon phase relationship between current and voltage. Using an LCR circuit, examines the effects of voltage and shows what the generator sees when X_L exceeds X_C and when X_C exceeds X_L . Demonstrates also a series resonant circuit using a LCR circuit where X_C and X_L are equal.

1. Electric circuits. 2. Electric currents, Alternating. I. U. S. Navy Dept. Order no. MN 8018-c 537.63 Fi E 60-11 U. S. Office of Education, Visual Education Service

Basic electricity: Capacitance in AC circuits (Motion picture) U. S. Dept. of the Navy, 1959.

5 min., sd., b&w, 16 mm.

Summary: Defines capacitance and demonstrates how a capacitor works; explains capacitive reactance and its effects in an AC circuit, the factors that affect capacitive reactance, and phase angle; discusses the physical factors that affect capacitance and the effect of capacitance in an AC circuit.

1. Electric capacity. 2. Condensers (Electricity) I. U. S. Navy Dept. Order no. MN 8018-b 537.242 Fi E 60-12 U. S. Office of Education, Visual Education Service

Basic electricity: Inductance in AC circuits (Motion picture) U. S. Dept. of the Navy, 1959.

7 min., sd., b&w, 16 mm.

Summary: Defines inductance and explains its cause and effect in an AC circuit. Illustrates inductive reactance, the factors that affect inductive reactance in an AC circuit, and the phase relationship between current and voltage as a result of the presence of inductance in the circuit.

1. Inductance. 2. Electric circuits. I. U. S. Navy Dept. Order no. MN 8018-a 537.63 Fi E 60-13 U. S. Office of Education, Visual Education Service

Basic facts you need to know (Filmstrip) Essential Education, 1958.

Biological techniques (Motion picture) Thorne Films. Released by Biological Sciences Curriculum Study of American Institute of Biological Science, 1960.

9 min., sd., color, 16 mm.
Produced and photographed in cooperation with RSCS of AIBS as part of a teacher-training program.
Also issued as three motion pictures.
With teacher's guide.
Contents: 1. Genetics: techniques handling drosophila (3 min.) Dr. Frank C. Erk displays fundamental equipment needed and shows techniques of etherizing, anesthetic, etherizing, and transferring stocks of flies.—2. Bacteriological techniques (5 min.) Dr. Delaplatius Wyckoff illustrates making cotton plugs, flaming wire loop, transferring culture from tube to tube and from tube to flask, pipetting, preparing agar plates, spotting, streaking, picking up cover slip by hanging drops, and forming a microculture chamber.—3. Removing frog pituitary (1 min.) Dr. John A. Moore reveals a quick method for location, identification, and removal of the frog pituitary.

Bright horizons (Motion picture) Reynolds Farm Institute,
1953. Made by the Motion Picture Dept. of Reynolds
Metals Co.
25 min., sd., color, 16 mm.
Summary: Explains how aluminum is stimulating the development
of improved farm structures in all sections of the country. Shows a
traveling demonstration coach of the Reynolds Farm Institute which
contains samples of modern aluminum building materials and models
of newest types of farm structures. Suggests how to use aluminum
building materials on the farm, describes correct application methods,
and explains how the use of aluminum benefits the farmer.

Buddhism, part 1 (Motion picture) KETC, 1956. Released by NET Film Service.

30 min., sd., b&w, 16 mm. (The religions of man)

Summary: Tells the story of Buddha and how he grew up to go out alone seeking eternal life. Explains that Buddha accepted the basic principles of Hinduism, but thought them cumbersome and would not abide by rules of social distinction. Relates how, after much hardship and failure, he finally arrived at a position near benevolence and began to preach his simple religion. Features Dr. Huston Smith, associate professor of philosophy at Washington University.

With teacher's guide.

Correlated with a book by Bertha M. Parker, published in The basic science education series.

Summary: Illustrates the difference between physical and chemical changes; explains that chemical changes are taking place every day, and that some chemical changes are advantageous, while others are harmful; and shows how some harmful chemical changes, such as those caused by bacteria, can be prevented.

Chemical changes all about us (Motion picture) Coronet Instructional Films, 1960.

14 min., sd., color, 16 mm.

With teachers' guide.

Summary: Points out that chemical changes are taking place around us every day. Illustrates that when chemical changes occur, substances form new substances, and energy is either used, or given off. Explains atoms and molecules, elements, mixtures, and compounds, and shows many familiar chemical changes such as oxidation, photosynthesis, and digestion.

Chemical clock reactions (Motion picture) KQED. Released by NET Film Service, 1956.

30 min., sd., b&w, 16 mm. (Tempest in a test tube)

Summary: Uses laboratory experiments to explain the factors which influence the rate of chemical reactions. Compares chemical reactions which take place almost immediately with those occurring after a timed delay. Demonstrates the effect of temperature, concentration, and state of subdivision on chemical reactions. Features Dr. Harry Sello of Shockley Semiconductor Laboratory at Mountain View, Calif.

Chemical conquest (Motion picture) Canada Dept. of Agriculture, Ottawa, 1956. Made and released by National Film Board of Canada, 1956.

25 min., sd., color, 16 mm.

Summary: Reports how chemical research is allied on the side of the farmer in his battle against the plagues which threaten his crops. Explains that scientists are developing new formulas to check the insects to which field and garden crops are subject. Shows laboratory experiments at the Department of Agriculture's Science Service Laboratory at the University of Western Ontario in London, and examines questions that still need to be answered about the ultimate effects of toxic substances on food-producing soil.

Christmas in Denmark (Motion picture) Arthur Barr Productions, 1959.

7 min., sd., color, 16 mm.

Kodachrome.

Summary: The story of a traditional Christmas celebration on a Danish manor farm. The children make decorations for the house and tree, and help their mother make marzipan candy and the special Christmas cookies called kugler. On Christmas Eve, rice porridge is placed in the attic for Julemanden, the Christmas elf, and members of the family enjoy the holiday dinner and sing the traditional Christmas tree song as they circle the decorated tree, after which Julemanden and the Danish Santa Claus, brings a gift for everyone.

Columbus (Motion picture) Yale University Press Film Service, 1923.

48 min., sd., b&w, 16 mm. (The chronicles of America photo plays) Based on the book *The Spanish conquerors*, by Irving Bertline Richmond.
Summary: The career of Columbus from 1485 to 1492. Shows how Columbus' plea for assistance is refused by King John of Portugal, and how years later his search for support leads him to the court of Ferdinand and Isabella of Spain, where an interview through the intercession of Juan Perez wins Isabella's aid. Shows the departure of Columbus' fleet, his journey, and landing on Watling Island.

30 min., sd., b&w, 16 mm. (World in action series)
French version released under the title *Le Commonwealth, no. 5: Le point de rupture*.

With study guide and kit.
Summary: Uses recent historic events to illustrate how conflict within the Commonwealth sometimes helps, rather than hinders the cause of world peace. Shows the Commonwealth members in the arena of world affairs, frequently taking diverging views on international issues, but able, through their very differences, to serve as a channel of communication between countries outside the Commonwealth. Analyzes some paradoxical situations that have arisen during the course of the "cold war" in which differing views and opposing loyalties inside the Commonwealth have helped to offset an East-West split.

34 min., ed., b&w, 16 mm.

With film synopsis.

Summary: Reviews a three-month study of a comprehensive therapy program at the Pottland Hospital and Training Center, Pottland, Maine. Dr. Peter Bowman, superintendent of the hospital, comments on the concept of treatment of mental illness emphasizing a therapeutic rather than a custodial approach, and its application in the field of mental retardation. He discusses results of a study, intended to evaluate a therapeutic program, of 144 female patients, half of whom received chlorpromazine (Thorazine) and half placebo; and describes vocational, educational, recreational, psychological, and other therapies administered, showing details of the therapeutic program, and summarizing results of comprehensive therapy. For professional groups.

Countdown at White Sands (Motion picture) U. S. Dept. of the Army, 1960.
25 min., sd., color, 16 mm.
Summary: Describes the organization, function, and facilities of the Integrated Range Mission (IRM) at the White Sands Missile Range, New Mexico, and shows how it provides range support to the three services for missile testing. Depicts the IRM equipment and the activities involved in missile testing and development, including optical and electronic instrumentation, instrumentation research and development, central timing, range signal services, air support, missile test scheduling, processing and reduction of missile test data, and missile recovery after firing. Shows the actual countdown and firing of a Nike Hercules missile to demonstrate the services provided by the IRM.

Counting electrical charges in motion (Motion picture) Educational Services. Released by Modern Talking Picture Service, 1961.
20 min., sd., b&w, 16 mm. (Physical Science Study Committee course film)
Based on the textbook Physics, by the Physical Science Study Committee.
Summary: Dr. James S. Strickland shows how an electrolysis experiment enables us to count the number of elementary charges passing through an electric circuit in a given time and thus calibrate an ammeter. He explains that elementary charges in an electrolysis experiment are identical to those in a Millikan experiment, and demonstrates the random nature of motion of elementary charges with a current of only a few charges per second.
Credits: Director, Gene Kearney; photographer, Abraham Moroch-nik; editor, Lawrence Silk.
